This is a modern fairy tale based on the Nart sagas of the North Caucasus. According to the story, the Narts were great warriors but became weak. They suffered from dragons, giants, snakes, robbers, and many others. Fortunately, there were three little elves Tim, Ilya, and Adelina that came to the Narts to save them. Thanks to the elves, they won the enemies and revived their land. Besides, the elves illuminated the world with knowledge. The Narts left their primitive occupations and started to develop their minds.

The tale familiarizes us with the mythology of the Narts and the main heroes of the sagas. It is also informative for children concerning a large variety of scientific advances.
